

Lestronic II and Lestronic III Chargers

36 and 48-Volt Battery Chargers for Golf Cars

48EL17 Domestic 120V 50/60Hz

The 24690 *Lestronic III* 48V 17A charger is our newest and most advanced portable charger. Redesigned from the ground up, it offers the most desired features for Golf use, along with a solid and robust microprocessor design. Lester Electrical's proven charge algorithm, combined with off-season maintenance modes, promotes long battery life and keeps batteries fully charged.

48EL17 Export 100/230V 50/60Hz

The new 24740 *Lestronic III* world charger is the ideal solution for shipment to all markets outside North America. Operating on 100, 220, 230 & 240V, either 50 or 60 Hz, this charger offers the same robust design and features as the domestic model with the addition of selectable voltages and a convenient IEC input connector for different AC cord sets.

36LC21 Domestic 120V 60Hz

The 14100, 36V 21A ferroresonant charger is built on Lester Electrical's reputation of performance and reliability. A completely sealed microprocessor timer control assures years of trouble-free operation. Should the 14100 become damaged, diagnosis and repair is simple and can be easily performed in the field. The 14100 maximizes battery life through a cost effective design and makes this charger the perfect choice for Golf and NEV applications.

36LC21 Export 230V 50Hz

Lester's 36V, 21A 14840 *Lestronic II* ferroresonant charger is a recognized industry leader in ruggedness and performance, while promoting long battery life. Suitable for wet batteries, the microprocessor controlled timer circuit outlasts the competition making it an ideal solution for 36V golf applications. Lester Electrical can custom manufacture this charger for specific markets, AC voltages, and frequencies. Consistent with Lester Electrical's full line of chargers, the 14840 *Lestronic II* is easily serviceable in the field.

INDUSTRY PROVEN

Lester Electrical has manufactured over 750,000 battery chargers for the Golf Cart industry and offers a variety of microprocessor controlled ferroresonant and SCR chargers for Europe, Africa, North America, and Asia.

DURABLE

Designed with the end user in mind, Lester's *Lestronic II Ferroresonant* and *Lestronic III SCR* chargers remain the world's choice for durability, performance, and ease of repair.

AVAILABLE CUSTOMIZATION

Lester Electrical battery chargers are available with private branding, custom colors, special features, and with graphics and manuals in multiple languages. Small production runs are also available to meet specific needs. Delivery times are typically three to four weeks. Contact a Lester Electrical sales representative for solutions to all of your charging needs.
